AROSA

WOOD WORKS

The initial task for the Arosa maisonette was the clients' wish to optimize the floor plan while adding an extra bathroom with shower to the guest bedroom. Go Interiors was responsible for the whole interior design including the development of the material, lighting and furniture concept. The master bedroom is equipped with a reading nook and lounge area guaranteeing a high degree of personal comfort and relaxation. The attic has been transformed into a kids bedroom with four beds. Downstairs a separate dining area offers space to enjoy family life while its decorative wooden structure echos the charm of Alpine chalets. The extensive use of wood and high-quality materials creates a well-balanced mixture of traditional and contemporary lifestyle.

AROSA

WOOD WORKS

A modern reinterpretation of the Alpine chalet using wood as a characteristic feature.
